VISIONARY FULL STACK SOFTWARE DEVELOPER

Known for big picture long-term strategies, and constantly seeking to optimize projects by analyzing implementations to eliminate unnecessary steps and streamline growth. Inquisitive by nature with an inherent autodidact enthusiasm and willingness to adopt new technologies. Never satisfied with the status-quo, constantly pursuing envelope-pushing software solutions. Seeking out the hard projects others shy away from, not for the reward but for the challenge. High caliber work ethic under stress. Attentive to details, even those that will go unnoticed. Passion for mentoring and elevating teammates to increase business productivity and performance. Intangible quality of being a sincere individual while being objective and focused on company's priority goals instead of ego.

PROFESSIONAL EXPERIENCE

KNOT MY YACHT Full Stack Developer | Culver City, CA **2017-2017**

Knot My Yacht is a software platform for recreational water sport industry. It integrates aspects of fleet management with a reservation admin dashboard and analytics system aimed at tracking user and sales data to drive revenue growth. An SPA application utilizing MEAN tech stack, backed by a MongoDB hosted on Azure, exposed via a RESTful API. The web client employs AngularJS and responsive web design practices for desktop, tablet and mobile devices. Agile development process with daily standups and Trello for task management. Present for the entire SDLC including strategies, testing and deployment.

- Developed the advanced search feature, accessible throughout the application with intuitive user-centric filtering options, implemented with custom Angular 1.x components.
- Deployed a secure admin dashboard with authentication, allowing the founder to impersonate agencies and access to aggregated data from all agencies.
- Cross integrated the company landing page to integrate with client's inventory and vessel availability, creating a connection between agencies and our product.

KICKS SOLE PROVIDER CMS Developer | Los Angeles, CA **2012- 2016**

A boutique shoe retailer with 4 stores and under 30 employees, catering to a passionate fan base and global shoe collectors. Crowds of overnight campers waiting for shoes to release was our clientele. Developed standard operating procedures relating to company logistics and online stores and marketplaces. Lead a team of 8 members to execute company culture and sales goals.

- Increased online sales by 20%, obtained through increased user engagement by utilizing Salesforce CMS and tailoring HTML, CSS and Javascript implementation for significant changes in UX/UI design.
- Developed the synchronization process of multiple marketplaces including Amazon, monitoring inventory, deploying new products and implementing an overall product lifecycle.

BEST BUY Sales Supervisor | West Hollywood, CA **2005- 2012**

Supervisor of two sales departments, with a total of 25 individuals. Analyzed business and sales reports on an hourly, daily and monthly goals. Developed, coached, and mentored individuals to exceed company expectations. Analyzed business and sales growth through profit and loss reports on a monthly, daily and hourly target basis.

- Winner of numerous sales competitions, including a coveted nationwide competition involving a trip to San Francisco, California, and spending the weekend with Monster Cable and Best Buy CEO's.
- Leader of the store community outreach program fostering volunteer partnerships with various neighborhood organizations
